PROBLEM DEFINITION

The ABCD mails situated in sub-urban place of Mumbai and was opened by ABCD Developers Private Ltd.

The 250,000 square feet (23,000 m^2) mall with a frontage of 700 feet (210 m). It was designed by Cooper and their partners. R Mall is a 4-storeyed air-conditioned mall covering an area of approximately 80,000 square feet (7,000 m^2) on each floor. The site includes a 7 level car parking facility.

The owner of the mall wants to develop the website of their mall in order to advertise its construction and features.

CUSTOMER REQUIREMENT SPECIFICATION (CRS)

The experts have given the requirements they have expected in the website:

Home Page:
- In the center it must display the image of the mall with some relevant information about it.
- The links must be shown for navigating the sites and to explore the features of the mall.
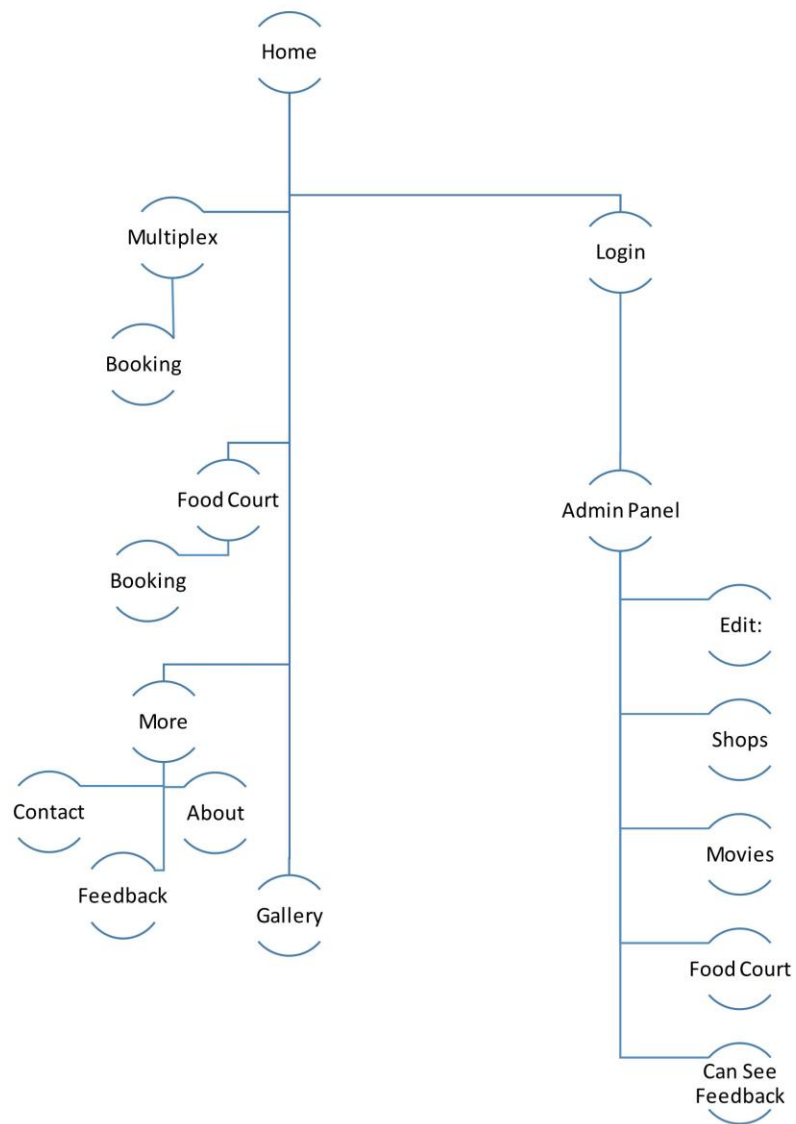

Features of functionalities:
- There should be a separate module for using the admin features and the client features.
- Admin will have the properties of editing the data of the mall like editing the name of the shop added, removed, deleted. While adding the details some images must be added in the website.
- Admin will also have the feature to edit the details of the movies of the mall.
- Client will have the property to view the features and edit the desired section them.
- The mall has an advantage features that allow the customer to book the ticket online for the movie through the website.
- Feedback is taken from the customer.
- Gallery section will be uploaded by the admin which consist of the pictures of various products available.
SCOPE OF THE WORK (IN BRIEF)

The website is to be developed using ASP.NET in software Microsoft Visual Studio. Since it's a web based project it also contain HTML, CSS, JavaScript, Bootstrap and JQuery. The ASP.NET is based on C#.

Every computing device nowadays have browser which makes this project easily accessible from any platform.
